

Migrant Programs

Migrant Programs reduce cultural and social isolation and increase academic outcomes for migrant families and children by providing academic and social supports, as well as opportunities for cross-cultural interaction.

2017 marked the Migrant Mentoring Program's 21st year. This year **46 migrant children** were matched with **26 community volunteers** for mentoring relationships. Since the program's inception in 1997, a total of **365 migrant children** have been matched.

Mentoring Program Evaluation Data

Each year, mentors and mentee families complete an evaluation process. The cumulative results are below:

- **97% of participants** demonstrated improvement in academics and/or interest in school.
- **98% of participants** demonstrated improvement in relationships.
- **97% of participants** demonstrated improvement in behavior.
- **94% of participants** demonstrated improvement in self-concept.
- Cumulatively, program participants maintained a **96% high school graduation rate.**
- Cumulatively, high school graduates increased to **31% college enrollment rate.**
